

ControlUp ONE Platform

Anticipate, prevent, and resolve issues instantly across every device, app, and workspace

One Platform. Complete Visibility. Autonomous Endpoint Management At Your Fingertips.

ControlUp ONE is the command center for the modern workspace, unifying real-time DEX capabilities with agentic AI to orchestrate a self-healing environment that anticipates, prevents, and resolves issues instantly.

IT finally gets the visibility and power needed to keep work flowing, regardless of device, app, or location. Empowering IT to:

- ✔ Save time and money by simplifying operations and eliminating tool sprawl.
- ✔ Act with confidence as agentic AI interprets signals to orchestrate or execute the right response.
- ✔ Proactively resolve issues before they impact employees.
- ✔ Prepare for an evolving IT landscape with migration support and compliance tools.

No Matter Your Tech Stack

ControlUp ONE Delivers Powerful Tools to Manage and Optimize Your Digital Workplace

Collect the Data

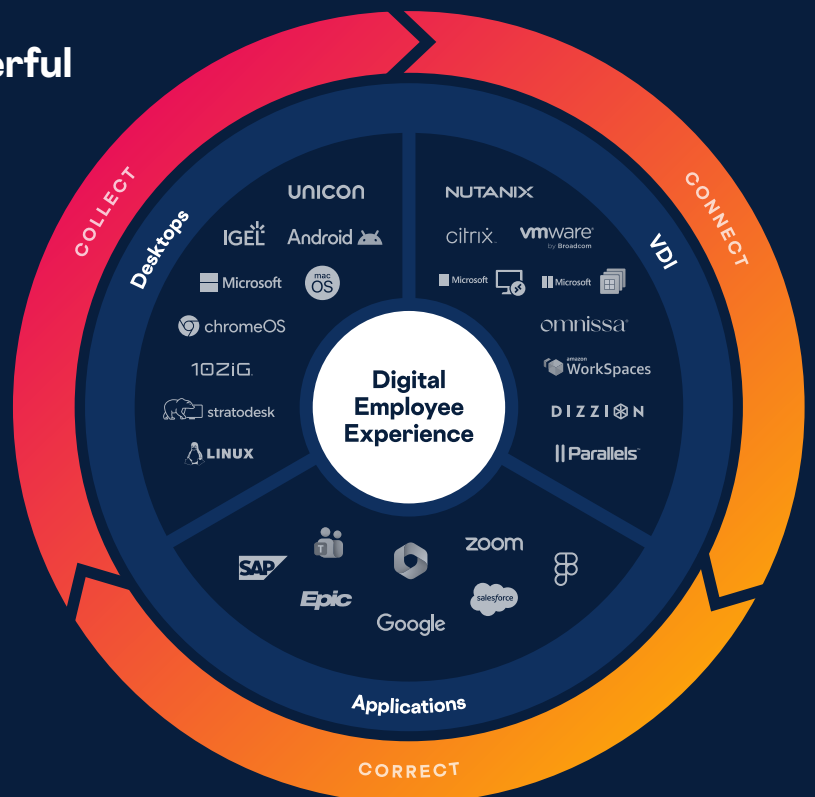

With full visibility into device health and performance data across every endpoint, app, and network, you can make informed decisions about your IT environment.

Connect the Dots

Spot trends, troubleshoot issues, and get actionable solutions through AI-powered analysis of real-time and historical data.

Correct the Course

Orchestrate autonomous remediations that resolve friction points before they become tickets.

See What Sets ControlUp ONE Apart

The ControlUp ONE is the Autonomous Endpoint Management (AEM) platform, integrating leading DEX capabilities with agentic AI to transform real-time signals into a self-healing environment where technology works for people, not against them.

Real-Time Monitoring and Management

High-frequency telemetry meets agentic AI. With 3-second data collection and a single-pane-of-glass approach, IT can identify, interpret, and remediate friction across desktops and cloud PCs to VDI, DaaS, and UC platforms.

Comprehensive Device and OS Support

Manage any device or OS—from hypervisors to endpoints—with support for Windows, Mac, Linux, Chrome, and more. Seamless integrations with Microsoft Intune, ServiceNow, and other key tools give IT one intelligent source of truth.

Autonomous Remediation

Agentic AI continuously interprets workspace signals and determines the right response, resolving issues automatically before employees ever feel them. Reduce support tickets, cut costs, and minimize disruptions.

DEX Scoring and Employee Sentiment Insights

Turn data into action with real-time digital experience scoring and engagement surveys. Deep insights help IT optimize the digital employee experience and create a better digital workplace.

[Learn More About ControlUp ONE →](#)

Technology should just work. No slow logins, sudden crashes, or waiting on fixes. ControlUp ONE closes the loop between deep visibility and autonomous remediation, consolidating disparate tools into a single, intelligent flow. No disruptions. No inefficiencies. No wasted time. A digital workspace that runs itself and delivers better workdays for everyone.
